**<For the tournaments>**

Setting the game configuration of the "EVENT" to "1 MATCH", will make a match result in a "GAME OVER" no matter who wins or loses. (No continuing for the winner is allowed.) This makes it easy to continue the tournament without turning off the switch whenever the fight is settled.

**<About JOIN IN>**

Setting the game configuration of the "JOIN IN" to "OFF" will prohibit the 2nd player join in during the game. It is useful when your players want to play against computer opponent only.
